Tom,

Here is my notice of intent To do a
Very small dig on Septarian lease # 26996
approximately 20 Feet X 80 Feet of disturbance, and
I will immediately upon completing the Septarian
removal re claim and re grade the area affected.

This dig will be in or near The North East
Corner of this lease.

I also plan To do another small dig
on same lease More To The South in the area
Mr. Ley's Gap has disturbed, along The West most

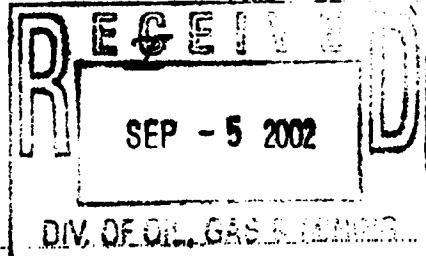

edge of The large pit Mr. Crapo has created,

I plan To do a 20 X 80 Foot dig on this
area and again will comply with all reclamation

requirements

Thank you

Joseph M Caruso

To whom it may concern,

In trying to right an accidental wrong,
being caused by no line marking the
new line Mr Harris has drawn, I have
mined and replaced "at my expence" a
weighed and measured (by Dave
Harris's Son in law) amount being 2
Tons of Septarian Nodules Taken from a
Measured 64 feet by 18 feet. Thus in my
Mind and Conscience, totally replacing the north
most dig that was accidentally done due to
a previous line that was established by
a excavation done by Shane and Ioy CP100
approximately 5 years ago. Then at that
time dug and split some Tons of Septarians
with myself due to the fact that they
had dug Mr Robert Harris's lease out

II

To The line between Harris & My own
line. Then although they had no permission
To mine on our lease, They Continued
into The Septarian Vein across My lease.

At This Time Mr Rex Harris Contacted My
son Micheal Caruso and informed him that
we should go out to the mine and check
the situation out. He (Micheal) did go out
to the mine (See Attached document from
Micheal Caruso). and they did dig and
split rocks with us, thus showing
that they had dug beyond Robert Harris's
Sub lease onto ours. In going on this
information and Verification of the boundary
lines, we Continued to mine into our lease,
and now with Robert Harris's New Line

III

which was not marked out across the area, only in the back corner (N/W) of his lease, we have (by accident and or misunderstanding the exact whereabouts of the boundary line) evidently dug approximately 3 Tons of Septarians from Robert Harris's Sublease. The measured & weighed amount fore mentioned replaced the north most dig we did, leaving a 20 x 40 foot dig that produced approximately 1 Ton of Septarian Nodules. In having done share dig's with Lay Craps he kept 70% and gave me 30% which makes me feel like since I dug 3 Tons for ourselves by accident on Robert Harris's lease, and I dug 2 Tons at my own expense & gave to Harris's Son in law Dave , in

III

My opinion I am even with Mr Robert Harris except for the reclamation which I was told to do & did get partially done, although now Robert Harris requests that I do not do the reclamation so he can take advantage of the open area I created making his next dig less expensive and easier as long as I am released from the reclamation responsibility that is OK with myself.

Joseph M Caruso
